#### DETAILED ACTION

1. A request for continued examination (RCE) under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.
2. Applicant's election with traverse of the species: "the fusion protein according to claim 3, the linker KKKRPRKKK (SEQ ID NO:2), the affinity binding pair biotin-streptavidin, and a fluorescent label," in Paper No. 30, filed 9/03/02, is acknowledged. Applicant's traversal is on the grounds that there exists only a limited number of species.
3. Applicant is advised that all previous rejections and the species election requirement have been withdrawn.
4. Claims 1-3, 5-10, 17-20, 23-24, and 27-28 are under examination.
5. In Paper No. 3, filed 05/22/98, Applicant submitted amended drawings for consideration comprising corrections hand-written in red ink. Hand-written corrections are improper and will not be formally considered. However, Applicant is advised that the change of "Sfg I" to Sgf I" in the corrections of Figure 1 will not be allowed.

New corrected drawings must be filed with the changes incorporated therein. See the PTO Form 948, mailed 8/04/99. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

Corrections other than Informalities Noted by Draftsperson on form PTO-948. All changes to the drawings, other than informalities noted by the Draftsperson, MUST be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings MUST be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections. Note that the filing of corrected drawings may no longer be held in abeyance until such time as claims are found allowable. Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in ABANDONMENT of the application.

6. The following are new grounds for rejection.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 5 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, Claim 5 depends on canceled Claim 4.

9. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

10. Claims 5, 23, and 27 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention.

Under *Vas-Cath, Inc. v. Mahurkar*, 19 USPQ2d 1111, 1117 (Fed. Cir. 1991), to satisfy the written description requirement, an applicant must convey with reasonable clarity to those skilled in the art that, as of the filing date sought, he or she was in possession of the invention, and that the invention, in that context, is whatever is now claimed.

There is insufficient written description to show that Applicant was in possession of an "affinity binding pair" as recited in the claims. It is noted that the term is not disclosed (and thus, not defined) in the specification, however, Claim 6 indicates that biotin and streptavidin comprise such a pair. Said minimal disclosure comprises an insufficient description of the term. As biotin and streptavidin comprise just a single species of a completely undefined genus, one of skill in the art must conclude that the specification fails to disclose a representative number of species to describe the claimed genus. See *Eli Lilly*, 119 F.3d 1559, 43 USPQ2d 1398.

11. Claims 18-20 and 27-28 are rejected under 35 U.S.C. § 112, first paragraph, as the specification does not contain a written description of the claimed invention, in that the disclosure does not reasonably convey to one skilled in the relevant art that the inventor(s) had possession of the claimed invention at the time the application was filed. This is a new matter rejection.

The specification and the claims as originally filed do not provide support for the invention as now claimed, specifically:

- A) "glutamic acid decarboxylase and islet cell antigen" (Claim 18),
- B) a label that is "radioactive or fluorescent" (Claim 19).

Applicant's amendment, filed 12/16/99, fails to assert that no new matter has been added. Regarding A), the specification discloses only the glutamic acid decarboxylase GAD65, not the generic glutamic acid decarboxylase as is now claimed. Likewise, the specification discloses only the islet cell antigen IA2, not the generic islet cell antigen of the instant claims. Regarding B), the specification discloses only lanthanide labels and not the generic radioactive or fluorescent labels of the instant claims.

11. Claims 1-3, 7-10, and 17 are allowed. Claim 24 is objected to as being dependent on rejected Claim 23.
